LEVEL 3 NVQ STRUCTURE FOR ACCESS OPERATIONS AND RIGGING (CONSTRUCTION) Version 4 of the combined NVQ and TQT structure November 2024

Total TQT minus Duplicated Learning

Totals

Guided Learning Hours eg contact time or supervised learning with a mentor/tutor/supervisor including onsite or in a classroom.

Assessment – The average hours it would take to assess the candidate's competence in the particular function – this can contribute to guided learning, but this has been kept separate in building the qualification value

Other Learning - eg Learners own study/research, practice of skills, compilation of portfolio of work evidence

Duplicated Learning – units are derived from National Occupational Standards. When the units are combined for the occupational NVQ, elements of learning in one occupational unit are repeated in others. Hence there is a degree of duplication. The organisations involved in determining TQT also agree the amount of time in each occupational unit that is duplicated. For this NVQ, these elements are considered to represent 40 hours. This needs to be included for TQT once for the occupational units, so where there are two occupational units (excluding core units 641, 642, 643, 209, 210 and 211) 1 x 40 hours would be deducted similarly where there are three occupational units (excluding core mandatory units 641, 642, 643, 209, 210 and 211), there would be a deduction of 2 x 40 hours = 80 hours

Nb: as qualifications are currently still built on units, which individually state guided learning hours, which has in the past excluded assessment, the values are shown separately

Nb: previous/older forms reflect Ofqual TQT guidance from March 2015 'After the QCF', where qualifications had to have Guided Learning, Directed Learning and Invigilated Assessment assigned as components of TQT

ref Endorsement

250	Two of the following: - ladders - stepladders/platform steps - proprietary towers - podiums - mobile scaffold towers
252	Two or more of the following: - scaffold/rigging - secured steelwork structures - wire and rope systems - permanently installed anchorage points - temporary anchorage points - track systems - proprietary systems
254	Occupational specific: One from the following specific occupational areas Steeplejacking: - vertical ladders and roof ladders Lightning Protection Engineering: - roof ladders - fixed ladders - tower scaffolds Rigging: - suspended access equipment - suspended platforms

255	Occupational Specific: Suspended access - Three of the following: - suspended platforms - winches - counterbalance suspension rigs - rope access anchor system - suspension rigs Lightning Protection Engineering - Two of the following: - block and tackle material lifting gear (manual and mechanical), - rope access anchor systems - counterbalance suspension rigs - suspension rigs Steeplejack - Two of the following: - block and tackle material lifting gear (manual and mechanical) - suspended platforms - rope access anchor systems - bosun's seats - winches - counterbalance suspension rigs - suspension rigs Offshore - Two of the following: - block and tackle material lifting gear (manual and mechanical) - rope access anchor systems - block and tackle material lifting gear (manual and mechanical) - rope access anchor systems
405	One of the following: - scaffolding - steeplejacking - rigging – suspended access equipment - off-shore scaffolding
406	Two of the following: - drop scaffolds - hung scaffolds - scaffolds to span gaps (bridging) - load bearing scaffold - scaffolds with restricted access and/or build restrictions - truss out
407	One of the following: - tube and fitting - systems scaffold

408	Two of the following: - raking-shore scaffolds - flying-shore scaffolds - deadshore scaffolds
410	One of the following: - tube and fitting - systems scaffold
609	One of the following: - tube and fitting - systems scaffold
659	Two of the following: - hand-operated power tools - static machinery - pedestrian controlled equipment - tracked plant - wheeled plant - rollers
664	Four of the following: - power unit - transmission - steering - hydraulics - pump - brakes - pneumatics - electrics - electronics - operating ancillaries or attachments
665	Heating; Two of the following: - Free components (thermal shock) - Heat treatment - Corrosion reduction/removal - Adjustment - Expansion and contraction fit Welding: Two of the following: - Oxygen and fuel gas - Manual metal arc - MIG or MAG - Tungsten inert gas Soldering: One of the following: - Oxygen and fuel gas - Iron and flux - Electric soldering iron Joints; Two of the following: - Butt - Lap - Corner - Fillet Corner Positions: Two of the following: - Vertical/horizontal - Vertical - Overhead Thermal Cutting: One of the following: - Plasma

Four of the following: - Electric systems	
- Cooling systems	
- Lubrication systems	
- Emission control	
- Hydraulic systems	
- Hydrostatic drive	
- Transmission systems	
- Pneumatic systems	
Braking systems	
668 - Vibration management	
- Steering/suspension systems	
- Generator output control	
- Electronic management	
- Powered access equipment	
- Material handling equipment	
- Water pumps	
- Craneage	
- Lifting equipment	
- Load testing	
Two of the following:	
- Attachments	
- Ancillaries	
- Fire prevention (spark arrestors)	
- Structural support (anchors and ties)	
- Safety measures (restricted movement pas	sage
or acess, warning alarms, notices, lights or	
governors)	
 Contaminant reduction (noise, gases, fluids 	
669 - Carriage of ancillaries/additional equipment	
- Rail and trackside	
- Cutting equipment (blade or teeth angles a	nd
aspects)	
- Additions (e.g. publicity boards, notices, light	nts)
Machine control (laser measurement or	110)
guidance, global positioning system)	
- Productivity measurement (weigh load sens	oro
compaction sensors)	5015,
compaction sensors)	
Et a state talle state
